

## Structural, Mechanical & Piping

PARC Engineering supply multi-disciplined construction teams that specialise in structural, mechanical and piping work. Our teams can include skilled and semi-skilled members including mechanical fitters, boilermakers, pipefitters, coded welders, riggers, and trade assistants. Our teams can either work autonomously or as integrated members of the client's project team.

## Electrical, Instrumentation & Control

PARC Engineering supply electrical construction teams to work either autonomously or as integrated members of a client's project team.

Our electrical crews are mobilised to site with the required skills and experience to ensure that project goals are achieved on time and within project specification.

PARC Engineering incorporates electrical verification specialists into our electrical construction crews to ensure that all installations are completed to the highest standard and are fully compliant with all applicable Australian Standards and project specific standards and specifications.

## People
